ANGULAR JS PROJECTS WORKED ON:

PROJECT 1:

Project Title	PORTFOLIO
Role	Developing the code & executing the project from beginning to end.
Technology used	HTML, CSS, W3.css, JSON, Angular 1.5.5

Web Server used	Node js http server	**Version Control**	Git and Github
Tools used	Sublime Text3	**Duration**	15 days
Team Size	1	**Wire framing**	Balsamiq Mockups
Project Location	https://techraiders.github.io/portfolio		

Explanation: "As a picture is worth a thousand words".

An effort towards going paperless and to help recruiters decide whether the level of skills of the candidate matches the job profile or not in online candidate shortlisting process: Project implements a beautiful, info graphic web based system where recruiters can visualize skills, experience, achievements, hobbies etc. through various interactive charts available.

PROJECT 2:

Project Title	CLASSIFIED ADS		
Role	Developing the code & executing the project from beginning to end.		
Technology used	HTML, CSS, Bootstrap, JSON, lodash, Angular 1.5.5, Angular Material Library, Angular UI router		
Web Server used	Node js http server	**Tools used**	Sublime Text3
Team Size	1	**Project Location**	http://techraiders.github.io/ngClassifieds/
Version Control	Git	**Duration**	2 Weeks

Project Features:

☐ **Add:** Adding new classifieds saves into the browsers and displays in the page.

☐ **Edit:** clicking edit button of classified opens that classified into side nav. User edits and clicks 'save edit'. Edited classified is displayed in the browser right away.

☐ **Delete:** User clicks the 'admin' button beneath the classified ad, it discloses delete button, user clicks delete and a confirmation dialog appears, it user confirms 'yes' classified will be delete from the web page.

☐ **Search:** Angular filters facilitate search. User chooses category from dropdown and searches classifieds by any property of available classifieds.

☐ **Route:** UI router has been used to provide different states of the web application.

INDUSTRY-PROJECT WORKED ON:

❖ Online Shopping System

Duration	Team size	Web Server used
6 Months	1	WAMP
Technology used	HTML, CSS, Bootstrap3, PHP.	
Tools used	MySQL Workbench, Smart draw	
Project location	https://github.com/techraiders/bestdeal	

Project Description: Developed an ecommerce website which sells Clothing, Electronics etc.

TECHNICAL SKILLS:

Version Control	Git and Github	Task Runner	Grunt
Framework	Angular js	CMS	WordPress
Dependency Management	Bower		
Databases	SQL Server 2014, MySQL, firebase.
